INDEX TO VOLUME 56

*Starred items are "Shorter Notes"

Andersen, Kenneth F. *Weighted norm inequalities for Hilbert transforms and conjugate functions of even and odd functions*, 99.

Ando, T. See Okubo, K.

Arnold, David M. *Strongly homogeneous torsion free abelian groups of finite rank*, 67.

Baggett, Larry. *Multiplier extensions other than the Mackey extension*, 351.

Bandle, Catherine. *Isoperimetric inequalities for a nonlinear eigenvalue problem*, 243.

Basinger, John O. *Cesàro summability of the conjugate series and the double Hilbert transform*, 177.

Becker, Joseph and Stutz, John. *Residual equisingularity*, 217.

Bennett, Colin. *A best constant for Zygmund's conjugate function inequality*, 256.

Bertram, Edward A. *On large cyclic subgroups of finite groups*, 63.

Bonvallet, K., Hartley, B., Passman, D. S. and Smith, M. K. *Group rings with simple augmentation ideals*, 79.

Bunce, John W. *Finite operators and amenable C^*-algebras*, 145.

Carlson, B. C. *The need for a new classification of double hypergeometric series*, 221.

Chein, E. Z. *A note on the equation $x^2 = y^q + 1$*, 83.

Chernoff, Paul R. *Two counterexamples in semigroup theroy on Hilbert space*, 253.

Cohen, Fred and Lusk, Ewing L. *Configuration-like spaces and the Borsuk-Ulam theorem*, 313.

Corwin, Lawrence. *$L^2(G_Q \backslash G_A)$ is not always multiplicity-free*, 329.

Curzer, Howard and Hager, Anthony W. *On the topological completion*, 365.

Dale, Louis. *Monic and monic free ideals in a polynomial semiring*, 45.

Daykin, D. E. *Corrigendum and addendum to "Pseudo-matchings of a bipartite graph"*, 380.

Dennis, R. Keith and Geller, Susan C. *K_1 of upper triangular matrix rings*, 73.

Dobbs, David E. and Papick, Ira J. *When is $D + M$ coherent?*, 51.

Eisner, Julian R. *Notions of spanning surface equivalence*, 345.

*Ewing, John and Moolgavkar, Suresh. *Euler characteristics of complete intersections*, 390.

Fialkow, L. A. *Which operators are similar to partial isometries?*, 140.

Fong, Humphrey. *Weak convergence of semigroups implies strong convergence of weighted averages*, 157.

Gavin, Lloyd A. *Some remarks on summability factors*, 130.

Geller, Susan C. See Dennis, R. Keith.

Genchev, T. *Inequalities for entire functions of exponential type*, 183.

Hager, Anthony W. See Curzer, Howard.

Hartley, B. See Bonvallet, K.

Hechler, Stephen H. *Two R-closed spaces revisited*, 303.

Heyde, C. C. *On asymptotic behavior for the Hawkins random sieve*, 277.

Houh, Chorng-Shi. *On totally real bisectional curvature*, 261.

Jech, Thomas J. *A note on countably generated complete Boolean algebras*, 272.

Kalton, N. J. *A note on the spaces L_p for $0 < p < 1$*, 199.

Kanter, Marek. *On quotients of moving average processes with infinite mean*, 281.

Kowol, G. *Conditions for the commutativity of semigroups*, 85.

Krueger, Warren M. *Peterson-Stein formulas in the Adams spectral sequence*, 377.

Lagnese, John. *The final value problem for Sobolev equations*, 247.

Lam, Clement W. H. and Payne, Stanley E. *Erratum to "Generalized relative difference sets"*, 392.

Lawson, Terry. *Homeomorphism of $B^k \times T^n$*, 349.

Legiša, Peter. See Vidav, Ivan.

Lepowsky, J. *Uniqueness of embeddings of certain induced modules*, 55.

Lewandowski, Zdzisław, Miller, Sanford and Złotkiewicz, Eligiusz. *Generating functions for for some classes of univalent functions*, 111.
